## Projects

---

### E-Journal Management System

2025 – Ongoing

- Developed a Django-based web app for research paper submission, review, and publication management.
- Integrated MySQL backend and GSAP animations for interactive UI.
- Role: Full-Stack Developer – built authentication, submission workflow, and reviewer dashboard.

### My Cinema Movie Website

2025

- Built a responsive movie website using HTML, CSS, and JavaScript with search and gallery features.

### Hotel Reservation System

2025

- Built a hotel booking website where users can check room availability and make reservations, with all data stored in a database.
- Created a clean and simple interface and connected it to the backend so users can log in and manage their bookings easily.

## Certifications

---

- Programming Certificates in C, C++,Java
- Python Full-Stack Development – Ongoing
- Hackathon Participation

## Extracurricular Activities & Achievements

---

- Active participant in college coding clubs and group projects.
